OVERVIEW OF VDOT'S COUNTY MAP SERIES DIGITAL FILES
September 1999

The Virginia Department of Transportation (VDOT) distributes statewide geo-spatial databases on its maintained highway transportation network. These files were created in an ARC/INFO® Librarian environment, and can be displayed, queried, and manipulated using ARC/INFO®, ArcView®, or ArcExplorer® GIS software. VDOT is sharing the files at no charge to enhance the accuracy, timeliness and usefulness of information developed and used by VDOT and others, which ultimately benefits Virginia's citizens, businesses and visitors. This edition reflects the state-maintained highway system as of December 31 1997 in approximately 64 counties throughout the state. The remainder of the counties are current as of July 1, 1995. A list of counties that have been edited since the previous CD release can be found in the documentation metadata files.

The files are available on CD-ROM in two versions. The details are outlined below.
